

An Unsolicited Letter From Facebook

I've been thinking quite a bit about the Dayton hospital and what an asset it is to our community. It provides employment, it provides services such as labs, xray, MRI, and Dexa scans. How many people in Dayton know you can "shop local" by simply using the services the Dayton hospital provides? You don't need to go to Walla Walla for many services your doctor orders. You have a choice to request your doctor send the orders to Dayton General. It is not your providers choice where you want to go for such services, it is YOUR choice. Your doctor works for you, not the other way around.

The scheduling times to get an MRI, labs, or other services in Dayton is much quicker than if you schedule in Walla Walla. By utilizing Dayton General you are helping to keep citizens employed and the community solvent.

I've not yet even mentioned Booker, or the physical therapy department both of which are excellent facilities.

Dayton may be a small community, but the services Dayton General provides are top quality AND they know your name.

Make a conscious decision to shop local. Shop at your local drug store, shop at your local grocery store, shop at your local hardware store, and "shop" at your local hospital. You'll be glad you did.
